

A data community designed for the management, distribution and analysis of Gas Balancing data.

Product Overview

- ✓ Intake Gas Balancing raw data and transform into industry standard statements
- ✓ Access all your statements, Operated and Non-Operated on a single platform
- ✓ Generate analytical reports for period-end close or A&D activities
- ✓ Quick Filter to see your critical action items
- ✓ Export reports in pdf or csv format

Features

Close Report

The only report you'll ever need

iGB offers a custom report that contains the Latest revision of the Latest sales date for all statements in the Capitalize inventory.

API Matching

Report Gas Balancing on API #

iGB Roadmap includes an API cross-reference solution to report your Non-Operated statements by API rather than by third party identifiers.

Contract Compliance

The *Gas Balancing Exhibit to the Joint Operating Agreement* requires the Operator to publish Gas Balancing statements to Owners on a defined frequency. By simply sending a file to iGB, compliance is achieved.

Risk Reduction

Publishing Gas Balancing statements in a timely manner allows the industry to reduce long term risk by allowing for judicious balancing initiatives and error resolution.

ANNUAL SAVINGS (\$)

Printing & Mailing Statements

Operated Activity

7X
in year 1

Period-End Close Activities

Non-Operated Activity

130
hours/month

Our business case is hard to beat in cost savings and delivering value. Ask us for your copy today!
